

Hurry back,
this is enough!

Ok, how do I
jam those in
the floor?

The best way to
plant them is to
rotate them in
place.

How many times?
5? 10? 15?

No, at least
1.000 times
each one!

This is not
going to work!

My technique to rotate
trees only rotates
them 10 times!

Remove the noise

Time to
focus!

Remove the noise just
from the first method

Remove the noise and
complete the second method

This is
the core

Composing
rotations

Remove the noise and
complete the last method

A white rabbit with large, upright ears is positioned in the foreground, facing away from the viewer and pointing its right hand towards a group of monsters in a dark forest. The forest is filled with tall, dark evergreen trees. In the background, a large brown bear with glowing orange eyes stands in the center. To its left and right are several wolves, also with glowing orange eyes. In the foreground, two pangolins with glowing orange eyes are visible. The sky is dark blue with a crescent moon and some clouds. The scene is lit with a cool blue light, creating a mysterious and ominous atmosphere.

Hurry, the
monsters are
coming!

Call twice enough times to do
at least 1000 full rotations!

We are
doomed!

Exhausted, terrified, but alive.
Our duo is now safe for the night.

Is this
over?

I'm beat

What... what
happened?

What have
I done?
How?

You just
made a
legendary
combinator

Day Four completed

I will
explain the
details on
the way
back.

Now let's
rest till
tomorrow.
